
Project Executable Files & Installation Guide

1. System Requirements

- **Python:** Python 3.9 or higher (Python 3.11 recommended).
- **RAM:** Minimum 2GB.
- **Disk Space:** 500MB free.

2. Local Installation Steps

Step 1: Clone the Repository

Clone the Opti-Crop code repository locally.

```
```bash
git clone https://github.com/AmbicaSairam/Opti-Crop.git
cd Opti-Crop
```
```

Step 2: Set Up Virtual Environment

Create a virtual environment to manage dependencies:

```
```bash
python -m venv venv
```

### Activate on Windows:

```
.\venv\Scripts\activate
```

### Activate on Linux/macOS:

```
source venv/bin/activate
```
```

Step 3: Install Required Libraries

```
```bash
pip install -r "5. Project Development Phase/requirements.txt"
```
```

Step 4: Initialize the SQLite Database

```
```bash
```

---

---

```
python "5. Project Development Phase/database.py"
```
```

Step 5: Execute Model Training & Assets Generation

```
```bash
python "5. Project Development Phase/train_model.py"
```
```

Step 6: Start the Application Server

```
```bash
python "5. Project Development Phase/app.py"
```
```

The application will launch on `http://127.0.0.1:5000/`.
